AQUA[®]
SONIC
D I E S E L

- ⊖ **CONSUMPTION/ENERGY USE (Up to 20% of oil save)**
- ⊕ **POWER/COMBUSTION (Longer until 15%)**
- ⊖ **CO2 POLLUTION (Reduction until 60%)**

Aquasonic Diesel carry out a physico molecular treatment through radio magnetic waves pulses within the diesel, leading to a molecular breaking before the combustion of the diesel, allowing a raise in the potency developed up to 15%, a significant reduction in pollution Co2 emissions up to 60%, and an oil consumption reduction until 20%, resulting in an increase of energetic efficiency. With Aquasonic Diesel you will not need anymore additive supply or substances added to the fuel.
